EXPERIENCE

Senior Frontend Engineer — bunch

2025 July - Present

bunch is building the Backbone for Private Markets. bunch enables modern fund managers with one integrated system that combines secure data infrastructure, AI-powered workflows and expert fund services. My team focuses on building features and delivering projects for Investors - mostly around democratizing investment and fund-performance data to Investors and building experience to ease day-to-day tasks.

Freelancer | Senior Founding Engineer — Otto

2025 Feb - 2025 June

Worked as full-stack engineer - with NestJS, NextJS, Python and GCP to build features and backend services to help advisers and clients (Wealth Management) automate their daily workflows.

Engineer | Co-Founder — Strike

2024 Feb - 2024 Nov

Built the entire frontend and backend ecosystem using NextJS, React, Typescript, ExpressJS. The effort involved setting up repositories, API endpoints (ExpressJS), Postgres databases (Supabase), Authentication and Authorization (Supabase). Backend was dockerized and pushed to ECR, and ECS subsequently picked up the image for deployment. Used Github Actions to deploy Design System with semver. Built v0 of Backend API using ExpressJS and TS. Also used Vercel and Netlify to deploy few frontend applications.

Strike is a product and growth intelligence platform that helps product builders understand their qualitative and quantitative data better with insights and stories. With Integrations, we help customers bring in their data. We do the hard work of analyzing and understanding their data and help them make better decisions.

Senior Frontend Software Developer — Sesame

2021 June - 2024 Feb

Sesame is building a radically new healthcare system for Americans who are uninsured or otherwise priced out of everyday care. Besides leading a11y topic within the company as part of the Frontend guild, I worked on delivering features and products as part of onboarding and discovery team - driving topics like SEO & Web Performance.

Senior Frontend Engineer — Durstexpress

2021 Jan - 2021 June

Durstexpress (now Flaschenpost) is an ecommerce platform focusing on delivering beverages to customers in Germany. The parent company Dr. Oetker acquired Flassenpost and the announcement was made the day I joined. My experience involved working with Flaschenpost engineers to consolidate the merger. This involved rebranding frontend, teaching Flaschenpost engineers about Industry's best practices in front-end ecosystem as Durstexpress's technology was more up-to-date in comparison to that of Flaschenpost.

Senior Software Engineer — Turlane

2019 May - 2020 Dec

Frontend Developer — Taledo

2018 May - 2019 May

Software Engineer — trivago

2016 Oct - 2018 May
